

Neuland Laboratories: Position on Policy Advocacy

With the objective of strengthening India's API Manufacturing ecosystem, Neuland Laboratories believes in proactively engaging on matters of local, national, and international significance within its sphere of influence.

Our Company Core values viz: Customer Centricity, Reliability, Accountability, Ownership, Openness & Transparency, enables us to actively engage with local and central government bodies on several topics of importance that matter to the API manufacturing sector generally, not limited to:

- Addressing global trade issues and supply chain strengthening
- Infrastructure Development and talent availability.
- Advocating for competitive tax policy to foster innovation.
- Statutory Compliance matters including environmental clearances.
- Collaborating with government and non-governmental organizations on Sustainability and Climate Change initiatives

We actively participate in programs and initiatives organized by several national and state industry platforms to share expectations and mobilize necessary momentum on the above-mentioned topics. Some of these include:

- Bulk Drug Manufacturers Association (BDMA)
- Confederation of Indian Industry (CII)
- Pharmaexcil
- Federation of Telangana Chambers of Commerce and Industry (FTCCI)

Additionally, as signatory to international sustainability initiatives such as the UN Global Compact, we believe in expanding our ability to influence sustainable change within our value chain and the ecosystem.

About Neuland Laboratories

Neuland Laboratories is a pure-play API manufacturer, upholds the highest standards of quality and compliance, with certifications from global regulatory bodies such as US FDA, EDQM, EMA, and WHO GMP.

Our core values guide our operations and our commitment to driving transformation, delivering growth, and deepening sustainability.
